

## The Production of Clean Milk and Cream for Industrial Purposes: Illustrated (Classic Reprint)

Excerpt from The Production of Clean Milk and Cream for Industrial Purposes: Illustrated This booklet has been written for dairymen and milkers who produce milk and cream, destined for delivery to a creamery. Its object is to contribute to the incessant efforts for the improvement of milk as a raw material for the manufacture of dairy-products. It is kept free, as far as possible, of learned expressions and figures, in order to make it a practical guide for those dairymen and milkers, who have not had the privilege of attending instruction-courses in dairying. The problems of the eradication of Tuberculosis in milk cows, and other diseases in cattle have not been dealt with in this treatise, as being of a veterinary nature and outside its scope. The hope is felt that it may help to impress on a great numbers of dairymen and milkers the urgency of greater efforts for the production of clean milk; the raw material for a class of food-products, that has such an important part in the feeding of the people. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
