

Away She Goes!: Riding Into Womens History (Setting the Stage for Fluency)

Most people take it for granted: riding a bike. In the late 1800s, the bicycle first came to the United States from Europe. This new steel horse was wildly popular. But for women, who either worked in factories or stayed at home, the bicycle liberated them like nothing ever has. One two-wheeled invention changed fashion, opened doors, and led to a movement in womens rights still felt today.
