

# Pattern Making: A Practical Treatise Embracing the Main Types of Engineering Construction and Including Gearing, Both Hand and Machine Made, Engine ... Parts, Pumps and Cocks, the Moulding of Patte

Excerpt from Pattern Making: A Practical Treatise Embracing the Main Types of Engineering Construction and Including Gearing, Both Hand and Machine Made, Engine Work, Sheaves and Pulleys, Pipes and Columns, Screws, Machine Parts, Pumps and Cocks, the Moulding of Patterns in Loam And The book in its present form, it is hoped, will be found a vade mecum of that trade in which I have been engaged, as apprentice, journeyman, and foreman, for the last five-and-twenty years of my life. To my fellow-workmen, to those draughtsmen who have lacked a training in the shops, to pupils pursuing their practical studies in our factories, to employers and managers in engineering works, to all, in short, who seek more than a mere smattering of knowledge relative to this, the first and most important branch of engineering construction, I respectfully dedicate this volume. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
