

Mariners Weather Log, August 2000

The Mariners Weather Log (MWL) is a publication that is released three times a year. The MWL contains: news, articles, and information regarding marine weather events, worldwide environmental concerns, climate studies, sea storms, and weather prediction. The Mariners Weather Log is dedicated to helping port officers, ship officers and their vessels. They do this by distributing information to the maritime community, scientists, educators, libraries, government, and other agencies. This is one of those publications.
