

Changing Gears and Changing Direction: A book for husbands that wives simply have to read

Derrick Dixon had achieved every career and sporting goal he had set himself by the time he was 43 and he had effectively reached the top of the ladder at his company. The problem was that he was feeling unfulfilled in his personal, as well as his business life. He became increasingly unsettled and sensed that he was probably experiencing the early effects of a midlife crisis. By stepping out of the corporate world and realigning his priorities, Derrick learned some amazing lessons about relationships, the meaning of life and some of the things that he felt called to do. In this inspiring and enriching book, he shares his experiences in a powerful, yet practical life application format.
