

Railroad Engineering: An Authoritative Manual of Modern Practice in the Survey, Location, and Construction of Railroad Lines and Terminals, Their ... Economic Management of Railroad Corporations

Excerpt from Railroad Engineering: An Authoritative Manual of Modern Practice in the Survey, Location, and Construction of Railroad Lines and Terminals, Their Operation, and Maintenance, and the Financing and Economic Management of Railroad Corporations In recent years, such marvelous advances have been made in the engineering and scientific fields, and so rapid has been the evolution of mechanical and constructive processes and methods, that a distinct need has been created for a series of practical working guides of convenient size and low cost, embodying the accumulated results of experience and the most approved modern practice along a great variety of lines. To till this acknowledged need, is the special purpose of the series of handbooks to which this volume belongs. In the preparation of this series, it has been the aim of the publishers to lay special stress on the practical side of each subject, as distinguished from mere theoretical or academic discussion. Each volume is written by a well-known expert of acknowledged authority in his special line, and is based on a most careful study of practical needs and up-to-date methods as developed under the conditions of actual practice in the field, the shop, the mill, the power house, the drafting room, the engine room, etc. These volumes are especially adapted for purposes of self-instruction and home study. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any

imperfections that remain are intentionally left to preserve the state of such historical works.
