

## The Che Diaries: Notes on a multidimensional love story

Proof of the spirit not perishing with the body upon death presented itself beyond question to the author when she wasn't even questioning this. She was on a journey to discover what was next for her after her relationship spontaneously and cruelly ended, nearly destroying her both emotionally and financially. Her partner broke up with her the same day her young niece committed suicide. He gave no reason for his decision, and simply wanted her to move out. Facing financial ruin from this vindictive multi-millionaire hell bent on destroying her, she had to move from where she called home for six years and endure the dissolution of the family they created with their adult children and new grandbaby. Devastated, yet calling forth her strength to rebuild her life, she took her savings and went to Argentina with a friend on an intentional quest to shake the grief and open her heart to what her true purpose was. It seemed like travel writing and photography were stirring her interests when she initially arrived in that country. After a week in Argentina, the energetic essence of what came to be known later as Che Guevara charged into Aves life and their journey of healing and love expanded both of them, shifting Aves life course entirely, opening her up to a purpose she would never have consciously known. This book is for anyone who is wrestling with the grief process after having lost anyone to what we fear and call death. Aves decision to publish her memoirs of this very personal journey is for anyone who has received communications from someone who has crossed over-be they loved ones or someone unfamiliar to them, with wisdom to share. This book will assist you with this process, and will reassure you beyond doubt that it is not grief, imagination or mental illness of some form that has found you to be an open channel to receive communications from a being or beings from another dimension.
