

Submarine Mines and Torpedoes: As Applied to Harbour Defence (Classic Reprint)

Excerpt from Submarine Mines and Torpedoes: As Applied to Harbour Defence Many other authorities have been quoted and are duly acknowledged in the text. My own inventions connected with submarine mining are perhaps noticed too prominently, but it was necessary to illustrate the various and necessary contrivances by some special patterns, and it not unfrequently occurred that I was compelled to describe my own patterns or none at all, the Government gear being treated as secret and confidential. For a similar reason, it being impossible to indicate the defects of our service arrangements with precision, I have been compelled to attack their intricacy in general terms only. On matters connected with the personnel and the purchase of stores, however, it has been possible to go into detail; and if some of the remarks appear to be harsh, my excuse must be that the subjects required it. Minced language is not a desirable form of expression when the writer believes that the efficiency of an important item in National Defence is at stake. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Harbour A battleship is a large armored warship with a main battery consisting of large caliber guns. Battleships were a symbol of naval dominance and national might, and for cheaper weapons: initially the torpedo and the naval mine, and later aircraft. Later in the war, French ironclad floating batteries used similar weapons. **Notes On Torpedo Fuzes**
