

## Deathscents: Intrigues of the Reflected Realm

The first instalment of an exciting NEW series from the author of The Wyrd Museum Trilogy and The Deptford Mice. Robin Jarvis's latest creation is a world set in an alternate past in a genre that can only be described as Science Fiction! This strangely familiar Britain consists of ninety-three individual blessed isles floating in the deep darkness and the story begins in December in the Gloriana Kalendar, when Elizabeth Tudor has reigned for one hundred and seventy-eight years. Into this world a place with no animals and little technology comes a stranger, Brindle. No one knows where he's from, or how he's arrived. But he brings strange implements and practices, and he's about to change things forever.
