

## World of Inventors: Leonardo da Vinci

Leonardo da Vinci's extraordinary curiosity made him one of the most prolific inventors in history: the submarine, armored tank, parachute, robot, and the self-banging drum are just a few of his creations. Now, children can not only discover what inspired Leonardo, but learn how to think like him, too. This exciting 40-page book brings the Renaissance world to life with stories, illustrations, diagrams, and hundreds of sketches by Leonardo himself. Young inventors also learn about the scientific method and how to learn from their mistakes concepts that are put to the test when they construct their very own model of Leonardos amazing flying machine.
