

## Divine Doorways and personal growth

This book attempts to settle questions that are incredible and shocking. Our planet produces invisible forces, powerful energies, and a history that exceeds our current willingness to accept. Many books deal with Cryptozoology, UFO reports, spirituality, ETs, and ancient technologies that offer endless speculation. This is not a definitive answer, but argues to accept & embrace these oddities; patiently & securely waiting until science understands the technologies we've seen and know exist.

Accept the unknown on faith; do not let ignorance frighten you. The answers will come, and scientific growth will occur. Short moral stories and personal observations provide advice on a bizarre world controlled by unseen and unknown forces. Scientists theorize UFOs run on magneto-electrical displacement engines - they just don't know how to make them...yet. Remember, airplanes became jets in under 50 years, & we have magnetic-levitation trains doing 700 mph.
