

The Chemistry of the Farm (Classic Reprint)

Excerpt from The Chemistry of the Farm This work is offered in the belief that it will meet the wants of many intelligent farmers, and others interested in the cultivation of the soil, who, while they have neither the time nor the inclination to take up Chemistry as a study, would gladly learn the present relations of Chemistry to Agriculture. The author of this book occupies an important position at Rothamsted. The most casual reader of Agricultural journals is aware that this is the name of an old English estate to which the labors of Messrs. Lawes and Gilbert have given a worldwide reputation as a station where abundant means, added to the highest scientific ability, have been devoted to the elucidation of Agricultural problems, solely for the benefit of Agriculture. Those labors are not for English agriculture especially, but have a world-wide application. The results which are freely given to the world, are those of experiments conducted in the field and stables, as well as in the laboratory, on a scale which gives them a practical value and commends them at once to the farmer as well as to the scientist. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
